Professional Summary

Computer Science and Engineering (Data Science) undergraduate with strong foundations in software development, Data Structures and Algorithms, Core Java, Python, SQL, and problem-solving. Hands-on experience developing software and data-driven applications using Python, Streamlit, MongoDB, and Git. Solved 100+ DSA problems on LeetCode and seeking opportunities to contribute to real-world software engineering projects.

Education

Rajeev Gandhi Memorial College of Engineering and Technology

B.Tech in Data Science

CGPA: 7.83

2023 – 2027

Nandyal, India

Technical Skills

- **Languages:** Python, Core Java, JavaScript, SQL
- **Web Technologies:** HTML, CSS, JavaScript
- **Databases:** MySQL, SQLite, MongoDB
- **AI & Data:** Machine Learning, Deep Learning, NLP, Computer Vision, Data Analytics
- **Tools:** Git, GitHub, Jupyter Notebook, Streamlit
- **Concepts:** Object-Oriented Programming, Data Structures and Algorithms, Problem Solving

Virtual Internships

Google AI-ML – EduSkills

Virtual Internship

- Completed a virtual internship focused on Artificial Intelligence and Machine Learning concepts and applications.

Siemens Data Science Master – EduSkills

Virtual Internship

- Completed a virtual internship focused on Data Science concepts, analytics, and data-driven applications.

Projects

Call Drop Prediction Using Machine Learning

2026

- Developed a machine learning system using 6,000 synthetic telecom records to predict call-drop risk based on network and user-related factors.
- Performed feature engineering, expanding 11 original features to 16 predictive features, including signal quality, mobility level, load category, and call risk score.
- Compared Logistic Regression, Decision Tree, and Random Forest, achieving 85.42% test accuracy and 0.85 F1-score with Random Forest; deployed the model using Streamlit and SQLite.

Smart Retail Monitoring System

2026

- Developed a Streamlit-based retail monitoring platform using OpenCV for automated shelf analysis and product-region detection.
- Implemented shelf classification across 5 expected shelf slots and integrated TextBlob for customer sentiment analysis.
- Built a sales prediction module using Linear Regression with 7 historical observations and stored shelf, review, and prediction data using SQLite.

Certifications

• Microsoft Azure Data Fundamentals – Microsoft

2026

• Kaggle: Python, Pandas

2026

• NPTEL Certification in IoT

2025

• NPTEL Certification in Soft Skills

2024

Achievements

- Solved 100+ problems on LeetCode, strengthening problem-solving and data structures skills.
- Participated in technical and poster presentation events in college.
- Participated in seminars and college club events.
